PROJECTS

Smart Pool — 2016
Smart Pool takes the stress away from trying to organize and manage office pools for popular sporting events. Features include live event scoring, hands-free signups, automatic submission scoring based on a sport statistics API.

Moody — 2016
A passive personal DJ that determines a song to play using speech to text and sentiment analysis to determine the mood of the room and plays a song corresponding to that mood.

EXPERIENCE

Muller Engineering, Lakewood, CO — Water Resources Engineer
September 2013 - June 2016
❖ Contributed to long-term multidisciplinary water resources projects
❖ Learned new technologies to streamline and optimize design processes
❖ Assembled on-call emergency action plans in response to the 2013 floods
❖ Large scale project estimation based on value engineering

University of Colorado, Boulder, CO —Campus Civil Eng. Intern
May 2012 - September 2013
❖ Designed small scale projects and oversaw construction of projects on campus
❖ Designed according to strict quality and regulation standards

EDUCATION

Galvanize, Denver, CO — *Web Development Immersive*
July 2016 - Present
❖ 1000+ of immersive technical computer programming course.
❖ Focused on tangible and real world projects.
❖ Learned industry standard and cutting edge technologies.

University of Colorado, Boulder, CO — *Bachelors of Science, Civil Engineering*
August 2008 - May 2013
❖ Studied Civil Engineering with a dual concentration in water resource design and environmental engineering.
❖ Studies included a term long senior 100+ page design project for Glendale Boardwalk proposal.

Outreach and Charitable work
• Instituted and ran a company Wellness program that encouraged and organized healthy activities for co-workers.
• Former Member of Engineers Without Borders Peru and Ecuador that partnered with small rural communities to develop a potable water systems, as well as latrines for waste sanitation.
• Former treasurer of the Associated General Contractors of America Boulder Chapter.
